RE: Site Inspection, Utah Building Stone Supply, Dove Creek Quarry, M/003/016, Box Elder County, Utah

Date of Inspection: August 6, 1996  
Time of Inspection: 10:30 a.m.  
Conditions: mostly cloudy and windy  
Participants: Gordon Struthers, USFS and Lynn Kunzler, DOGM

Purpose of Inspection: To review and discuss ongoing reclamation activities on site.

The Bown's have been interested in opening new pit areas within the disturbed area at this site. Before being allowed to do so, the Forest Service instructed them to reclaim part of what they had previously opened. Since the last inspection on June 24, 1996, the Bown's have regraded most of the northwest pit area (about 2.5 acres). There is still about 0.1 acres that needs to be regraded and there is some palletted stone that needs to be removed. This fall the area should be seeded and the access road to this pit should be reclaimed as well.

They have moved their track hoe onto the 2 acre parcel where the topsoil had been previously removed and salvaged. No stone has been removed or palletted in this area. Several photos were taken to document the site conditions.
